# 教學支援：G1(CET)Festival

- ▶ 圖書館根據教師需求，蒐集彙整臺灣傳統節日相關資料於數位學習網，以利教師於課堂中帶領學生學習如何介紹這些節日的特色，邀請外國朋友一起慶祝臺灣傳統節日。

- ▶ 學生於課堂中專心閱讀數位學習網「Festival」專區之節日資料，並認真與教師討論。

# 教學支援：G2(FET)Career

- ▶ 經了解教師課程需求後，圖書館整理相關資源供教師於課堂中利用，除了提供各班Career主題共讀書外，也協助挑選設定Career電子書，以利課堂閱讀活動的進行，提升課堂閱讀效益，另外圖書館也提供相關教學影音資源，讓學生透過影片能更加深學習印象。

- ▶ 學生透過紙本與電子書籍專心閱讀，完成學習任務。

- ▶ 有不懂的地方認真地詢問老師。

- ▶ 教師利用教學影音資源讓課堂的教學更加多元，學生也對於各種職業有更深入的了解。

# 教學支援：G2(CET)Take care your pets

- ▶ 針對Take care your pets主題，圖書館於myOn電子書中建立閱讀任務，彙集適合二年級學生閱讀之寵物照養書籍，並整理其他相關期刊與影音資源於數位學習網專區，帶領學生認識各種動物，瞭解不同動物的習性，學習如何照顧這些動物。

Book Cover Overview

**Are Humans Damaging the Atmosphere?**  
 Car, train, ship or aeroplane – which form of transport is most harmful to the atmosphere? What do farming techniques such as agrochemicals do? What is 'acid rain' and what are effects of it? This book takes a look at the impact that our modern world is having on our surrounding environment, from our use of fossil fuels and our increase in global food production and building work, to the rise in our transport production. Discover what steps scientists and engineers, and even ordinary people, are taking to develop sustainable solutions to these problems, from replanting forests to buildings bound together using horse hair!

**How Harmful are Fossil Fuels?**  
 Is burning coal still harmful today? What is fracking? What do we do when fossil fuels run out? This book looks at the potentially harmful implications on the state of our planet from the use of fossil fuels, discussing in depth the various techniques of fossil fuel extraction such as longwall mining for coal, the major effects of oil leaks and spills on the ocean and the reason for even a new type of rocket fuel.

	<b>Coal</b> The major source of fuel throughout the world is coal. Coal is a black or brown rock that, when burned, releases energy in the form of heat. One of coal's main uses is the production of electricity.
	<b>Coal Power for Kids</b> In areas where coal is surface mined, the areas are forever changed. Since dynamite is often used, mountains, streams, and trees are destroyed.
	<b>Coal fired power plant</b> This resource is being used as a textbook to teach a number of courses in University of Calgary.
	<b>Coal: Energy Source Fact File!</b>

	<b>Fossil fuel. (2020).</b> All the machines of modern life require energy to make them run. About 90 percent of that energy comes from burning fossil fuels.	<a href="#">BritannicaSchool</a>
	<b>Global warming. (2020).</b> For much of Earth's history, greenhouse gases were not a problem. This situation changed as people came to depend on fossil fuels (oil, gas, and coal). People burn fossil fuels to power factories, run cars, produce electricity, and heat houses. As fossil fuels burn, they release carbon dioxide into the atmosphere.	<a href="#">BritannicaSchool</a>
	<b>Coal. (2020).</b> Compared to other energy resources, coal is inexpensive and plentiful. However, coal has several disadvantages.	<a href="#">BritannicaSchool</a>
	<b>Fire As a Tool</b> The skills necessary to make, control, and use fire for increasingly varied and complex purposes were vital to improving life for early humans. By the late Paleolithic or last part of the Old Stone Age, various pre-hominid species had learned simple fire-tending basics that would furnish light and heat for warmth and cooking.	<a href="#">ResearchRocket</a>

	<b>Coal 101</b> Coal is a combustible black or dark brown rock consisting of carbonized plant matter, found mainly in underground deposits and widely for electricity production.
	<b>Coal 101: What's Wrong with Coal?</b> From mining, to burning, to disposal, coal is wreaking havoc on our health and our planet. Powering our country by burning coal is dangerous.
	<b>How to create cleaner coal</b> Coal releases pollutants into the air, causing environmental damage like acid rain and serious health problems. Can we create a cleaner version of coal?
	<b>Clean Coal - Behind the News</b> The future of coal has been questioned with some people arguing that we should be burning more coal while others say we should be trying to use less of it for environmental reasons. But the PM says 'clean coal' could be the solution to both issues.
	<b>Coal pollution in South Africa</b> South Africa gets 90% of its electricity from coal-fired power plants. And the consequences are severe as air and water pollution lead to serious illness and death among residents, while arable land is lost to mines.
